

It's been a strange time over the last few months with customers unable to travel to us with their cars. Due to the nature of the long term restorations we carry out, we have been occupied but we know that lots of members are waiting until the day they can get their car booked in with us. We are still operating as best we can, and when restrictions are eased, we look forward to welcoming you and your MG back to us. In the meantime we have been carrying on with these MGBs.

# WORKSHOP DIARY

## Baby Blue B

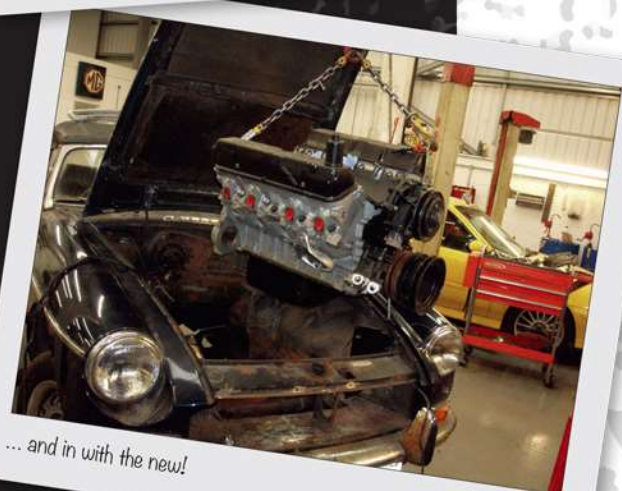

This early MGB roadster used to be Iris Blue. Now it's with us for major body restoration using old stock original MG panels stored by the customer. The most exciting part? It will be returned to the original colour when the rest of the work is complete. Have you dramatically changed the colour of your car like this MGB? Email [enjoyingmg@mgownersclub.co.uk](mailto:enjoyingmg@mgownersclub.co.uk) with your before and after photos for a chance to be featured.

Out with the old...

MGB undergoing a major restoration

... and in with the new!

## Exciting Upgrade

Out with the old, and in with the new. This MGB 1800 is being converted to a 4.0 litre V8. Once the many modifications are complete and it will all be removed again ready for bodywork restoration and paintwork to be completed.

You can see the original colour here

We will keep you updated on this MGB
